## Education

Delhi Technological University

August 2024 – July 2028

Bachelor of Technology in Software Engineering

## Experience

Web Developer Intern

June 2025 – July 2025

Vardhman Airport Solutions 🏢

New Delhi, India

- Led end-to-end development of a **production-grade website**, streamlining product catalog display for **200+** items and improving page load performance by **50%**.
- Built **dynamic components** and a **backend product management system** using EJS & JSON, enabling direct product updates and reducing manual effort by **60%** while improving scalability.
- Integrated **real-time LinkedIn feeds** to enhance site freshness, increasing visitor engagement by **45%**.

Open Source Contributor

Jan 2025 – Feb 2025

[Retro](#) (Winter of Code - IIIT Kalyani) 🏢

Remote

- Contributed to a **production-grade open-source codebase**, implementing full-site **dark mode toggle**, improving UX.
- Reduced **JavaScript redundancy** and improved **code maintainability** by **35%** through logic optimization.
- Collaborated using **Git** (**15+ commits**, **5 PRs**); resolved **100%** of assigned **GitHub issues**.

Backend Developer Intern

May 2024 – Present

Maharaja Agrasen Bhawan (V.K.S)

New Delhi, India

- Developed and managed a **production-ready MySQL database** with custom **Python interface**, reducing data entry errors by **60%**.
- Streamlined admin workflows and update procedures, improving **query efficiency** by **40%** using indexing.
- Oversaw **public relations and reporting**, managing data logs for **1000+ entries**.

## Technical Skills

**Languages:** C/C++, Python, SQL, JavaScript, TypeScript

**Technologies/Frameworks:** ReactJs, nextJs, Node.js, Express.js, Bootstrap, tailwindCSS, jQuery, EJS, Firebase, mongoose, prisma ORM

**Databases :** mySQL, Redis, postgresSQL, mongoDB

**Version Control/Tools:** VS Code, Git/Github

## Projects

SafeConnect | 🏢 🏢

Node.js, Express.js, MongoDB, Leaflet.js, TailwindCSS, Firebase

- Developed a **real-time safety platform** with SOS alerts, incident reporting, and map visualization; Visualized incident density with **heatmaps** via **Leaflet.js**, enabling **40% faster response simulation**.
- Integrated **Aadhaar-based verification**, **JWT-secured APIs**, and **Firebase Auth** for secure usage, reducing spam incidents by **70%**.
- Collaborated with a team of developers using **Git** and **GitHub** for version control, contributing **40+ PRs** and resolving **15+ issues**.

SociaLive | 🏢

React, Node.js, Express.js, Bootstrap, MongoDB

- Built a **social event platform** where users can host or join events; Implemented **event filters and constraints** using **dynamic routing** and **form validation**.
- Designed secure backend APIs with **JWT authentication** and custom **MongoDB schemas**, supporting **100+ concurrent users**.
- Maintained **100% commit hygiene** with organized Git branches and code reviews.

## Technical Highlights

- Mastered **Data Structures & Algorithms in C++**; Solved **200+ problems** across platforms like LeetCode, Codeforces & GFG; ranked in **top 15–20%** in multiple contests.
- Strong foundation in computer science fundamentals, including **object-oriented design**, **complexity analysis**, and **core operating system concepts**.
- Managing the **admin portal** of [fresources.tech](https://fresources.tech), enhancing academic resources and improving access for **3000+** students.
