

Clinometer For Precision Approach Path Indicator

Technical Specification

Parameter	Value
Length	124mm
Range	360°
Resolution	0.5 min
Accuracy	1.5 min
Height	150mm
Width	30mm
Magnetic	No
Case Material	Cast Iron

Features

- Measurement range 360°
- Accuracy better than 1.5 minutes over full measurement range.
- Hardened precision ground base with flat and V surfaces.
- Working in environmental condition of -10° to +55°
- Easy to operate

Applications

- Angle setting of Precision Approach Path Indicator
- Angle reading in Degree and Minute
- By rotating the micro meter drum

Packing Details

- Supplied in a protective wooden box.
